Dear Friends and Neighbors,

Welcome to the final celebration of us as Cedarflo Angus. A small background for those who may be new. Cedarflo Angus has been raising registered angus for over 70 years. We have been performance testing since 1968 and Dad (Dave) started adding the finest genetics thru AI in 1979, allowing us to maintain a closed maternal herd. Traditionally holding a production sale in February, selling both yearling bulls and replacement heifers, has allowed us to share our genetics with local cattlemen who desire honest cattle. I'd like to think that through four generations we have been able to provide premium Angus genetics with a real concern for both the animal and those purchasing them. Thank you to all of our customers. It has been a real joy working with you over the years, I know previous generations would agree.

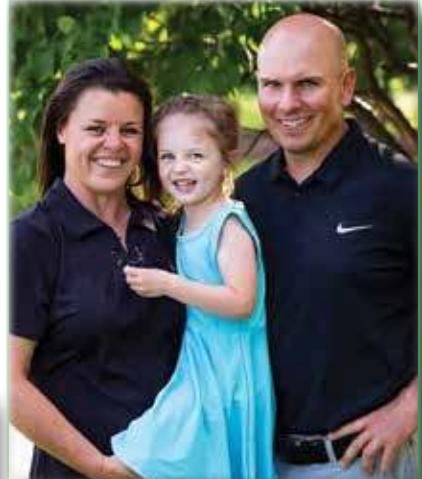

All animals in the sale have been through a comprehensive vaccination protocol, prescribed by West River Vet Clinic. All bred animals have been ultrasounded by WRVC in late summer to provide estimated calving dates, and will have pregnancy confirmed the week before the sale. This year's heifers will be Bangs vaccinated and will sell with registration papers if desired. Bull calves selling, will be sold as is, unless the buyer chooses to accept the terms of the wintering program. You can find the wintering program in subsequent pages. DVAuction will be posting videos of all animals by the end of November. We will have any further, pertinent information on our website: www.cedarfloangus.com Animals will be transported to Lemmon Livestock on Thursday, December 6th. You're all welcome at the ranch anytime before then to inspect or just shoot the breeze.

The decision to disperse was, by far, the hardest decision of my life. I'm hoping to find time in my next life to do more than kiss my four-year-old, goodbye and goodnight. It's impossible to adequately convey all the relevant information about these animals in this short synopsis. These cattle are a product of lifetimes of love and toil, hopefully you find them reflecting that well. Please contact me for further information. I promise to offer an honest assessment of any of these cattle. We know them all and just like any other cattlemen, we enjoy talking about our cows.

We'll miss you and thanks again,

Jeremy

Welcome Angus Breeders,

A truly final day in the 70 year history of Cedarflo, as Cedarflo Angus is dispersing their entire herd. The Fordahl Family are great people with four generations of breeding Angus cattle behind them. Performance testing since 1968 and an extensive AI program since 1979, you will be able to reap the benefits of this very maternal herd.

This dispersal will feature all of the Cedarflo quality genetics throughout the sale book. Jeremy and Jennifer are a great people with top work ethics and have been truly dedicated to the Angus breed. The decision to disperse the herd was an extremely difficult choice for Jeremy as this is the herd he, his father and grandfather spent their lifetimes building.

We have seen the entire herd for sale at the farm and can attest to the quality and depth you can only find in a dispersal of this kind on Saturday December 8th. We will be at Lemmon Livestock Auction sale site ahead of the sale. If we can assist in any way, please give us a call.

Videos will be available to view at

Wintering Program

We understand how difficult it may be to assess the value of a bull calf when he is barely going through puberty, therefore we would like to provide an option other than "as is". Unfortunately bull calves at this age are unable to be measured on the same metrics that they would normally be held to at a year or later (ex. Scrotal measurement, semen test, etc). We wanted the opportunity to guarantee you a breeding animal at the time of maturity.

Wintering Cost: \$400 (In addition to bid price)

What that additional money gets you:

- Yearling scrotal measurement and weight
- Status updates concerning animal maintenance via email (shots, pour on, etc)
- **AngusGS** DNA test (\$37 value). This test enhances an animals EPD's up to the quality of having multiple progeny. It also shows this animal's genetic ability across a multitude of traits.
- **Cedarflo Money-Back Guarantee:** This animal is guaranteed to pass a breeding soundness exam administered by West River Vet Clinic (\$35 Value - The most stringent testing clinic around.) First test administered in April/2019, we reserve the right to administer a second test upon vet recommendation. He is guaranteed to be a sound breeder for the first breeding season, defined as the first 90 days after turn out. We do not guarantee against injury or death as that is out of our control after delivery. If an injury occurs before delivery, the animal is covered. Should the animal be delivered and have subsequent breeding issues defined by a vet, the animal will be sold by you, receipt of animal sold submitted to us and balance of pound price and purchase price refunded. If the bull doesn't pass a breeding soundness exam or should he get injured before taking possession, we retain salvage possession and refund you full purchase price.
- Free feed and necessary medical care until delivery in May 2019
- Delivery within adjoining states will be free and made in May 2019.
- Delivery outside of adjoining states may have additional fees.
